

B411 Specifications

Fast, affordable mono printing for every small business

The B411 brings productive, high quality black & white printing within the reach of every small business. There's no need to compromise between price and performance. You can have all the features you need in a reliable, robust design that will not stretch your budget.

Choose the B411d for fast individual printing or the B411dn to give all on the office network access to this high productivity device.

Designed for performance

Click to print and the first page appears in under 5 seconds. And with continuous print speeds of 33 pages per minute it's easy to understand why we've designed the paper supply to be expandable right the way up to 781 sheets. Of course, there's more to performance than fast print speeds. So you'll be pleased to know that the B411 comes with a powerful 330MHz processor, 64MB memory (expandable to 320MB), for maximum throughput. Plus, it comes with OKI Template Manager – the easy way to create and print a wide variety of office documents.

Minimum expenditure, maximum value

The combination of the rapid print speeds, crisp 600 x 2400dpi resolution output and automatic double sided printing will save you time and paper whilst delivering the professional looking documents you want. We also include a three-year warranty for extra peace of mind.

Engineered for ease of use

There's nothing complicated about the B411. Because the toner cartridge and drum are all separate, you only ever have to replace what needs replacing quickly and cleanly in a matter of moments. The compact design gives you easy access to your printed documents and there's even a backlit 2-line LCD display, which gives you real time information about the status of the printer.

Built for endurance

Small businesses with restricted budgets know that every piece of IT equipment has to deliver maximum value for money. The B411 uses ultra-reliable digital LED technology (pioneered by OKI and proven over more than 20 years) with fewer moving parts for exceptional durability. This robust, built-to-last design means that we are confident enough to give you our industry-leading three-year warranty at no extra cost.
