We believe that technology will shape the future of education. It enriches the student experience, opens new income streams and enhances the exploration of knowledge and understanding within this global market.

- We work with over 14,000 educational institutions
- We have 33,500 students pledged to be BT Digital champions and spend an hour passing on IT skills to people in their local community
- We are supporting student and staff digital literacy through BT's Donate to Educate programme
- We are supporting student attainment through BT's TUTE programme
- We pioneered the IT Ambassadors scheme, which aims to support teachers and young people by growing understanding of what our sector does, how it works and the technologies we use by connecting young people with teachers with those working in the communications and IT sector
- We support better student outcomes through the regular creation of graduate and apprenticeship opportunities across BT
- We are a key UK and global investor in university and research.
