Consult Safety Instructions Before Use.

Install Battery Pack

Welcome to Flip UltraHD™

- 1 Slide battery latch to unlock.
- 2 Slide front panel down.
- 3 Position rechargeable Lithium-ion battery pack with + and - at the right side and Flip Video™ logo facing up.

Note: The battery pack is shipped partially charged. For best results, fully charge (up to 3 hours) before use. Simply follow steps in the Recharge Battery Pack section.

Using AAA Lithium Batteries

If you need a backup power source for your UltraHD, three AAA lithium batteries will provide power for a limited period of time.

Note: Alkaline batteries do not provide sufficient power for reasonable video camera usage and are not recommended.

Get Started

- 1 Press power button to turn on. Video camera setup appears automatically the first time you power on.

Set Language

- Use + and - to select your language.

Set Date

- Use + and - to adjust current setting.
- Use < and > to select month/day/year.

Set Time

- Use + and - to adjust current setting.
- Use < and > to select hour/minute/AM/PM.

Set Tones

- Use < and > to turn the tones on and off.

Set Recording Light

- Use < and > to turn the recording light on and off.

To Return to Video Camera Setup Later

Starting with the video camera OFF:

- 1 Press power button to turn on.
- 2 When UltraHD logo appears, press and hold record button until SET LANGUAGE appears.

Record and Play

Record Videos

- 1 Press [red button] to start/stop recording.
- 2 Press and hold + and - to zoom in/out during recording.

Play Videos

- 1 Press [right arrow] to play/pause.
 - 2 Press and hold + and - to increase/decrease volume.
 - 3 Press < and > to view previous/next video.
- Note: Press and hold < and > during playback to rewind/fast-forward.*

Delete Videos

- 1 Press [trash icon] button. Select YES to confirm.

Note: Delete button is locked the first time you power on. To unlock, press and hold delete button.

Connect to Computer

- 1 Slide USB latch down. USB arm flips up automatically.
- 2 Plug USB arm into USB port on computer.
- 3 The battery pack will begin recharging and you can install pre-loaded FlipShare™ software on your computer.

Recharge Battery Pack

- 1 Slide USB latch down. USB arm flips up automatically.
- 2 Plug USB arm into USB port on computer.
- 3 Screen will display charging status.
 - [charging icon] displays to indicate charging in process.
 - [full icon] displays to indicate a fully-charged battery.
 - Fully recharging the battery pack takes up to 3 hours.
 - Disconnect your video camera from the computer after charging to help preserve the battery pack's lifespan and performance.
 - The optional Flip Video Power Adapter (available at www.theflip.com/accessories) can charge the battery pack in about 2 hours.

Note: Your computer must be powered on for your video camera to charge.

Organize, Create and Share

flipshare™

Pre-loaded FlipShare software makes editing and sharing your videos easy.

FlipShare Features

- Save videos to your computer.
- Organize your video library.
- Capture snapshots from your videos.
- Create custom movies and greeting cards.
- Share videos privately with friends and family or upload directly to:

FlipShare Installation Instructions

Just plug in your video camera and follow these simple steps.

Windows XP

- Select VIEW YOUR FLIP VIDEOS. Click OK.

Vista/Windows 7

- Select OPEN FOLDER to view files. Open SETUP_FLIPSHARE.

Mac

- Open FLIPVIDEO drive. Select START FLIPSHARE.

Visit the FlipShare software HELP section for detailed instructions on all features.

600-0151-103 / 3250-00249

View On HD Television

- 1 Power off video camera and television.
- 2 Connect video camera to television with optional HDMI™ Cable (available at www.theflip.com/accessories).
- 3 Power on video camera and television.
 - Video camera screen will be off when connected to television.
- 4 Switch your television to the appropriate VIDEO input.
 - See television manual for instructions.
- 5 Press play button to start/pause playback.

HDMI

Note: You can use any brand of HDMI Cable that has an HDMI Connector (for the HDTV) on one end and HDMI Micro Connector (for the video camera) on the other end.

Declaration of Conformity:

Responsible Party:

Cisco Consumer Products LLC, 185 Berry Street, Suite 6500, San Francisco, CA 94107 USA

FCC Compliance Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Radio and TV Interference

This equipment has been tested and found to comply with the limits for a Class B digital device in accordance with the specifications in Part 15 of FCC rules. These specifications are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the manufacturer's instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

CAUTION: Changes or modifications to this device not authorized by Cisco Consumer Products LLC may void the user's authority to operate this device.

CANADIAN ICES-003 STATEMENT:

This Class B digital apparatus complies with Canadian ICES-003.

Operation is subject to the following two conditions:

1. This device must not cause interference and
2. This device must accept any interference, including interference that may cause undesired operation of the device.
