General information

For information on safety instructions, cleaning, technical information or connecting to a switchboard, please refer to the 'General information' section in the full user guide at www.bt.com/producthelp

Guarantee

Your BT Converse 2200 is guaranteed for a period of 12 months from the date of purchase.

Subject to the terms listed below, the guarantee will provide for the repair of, or at BT's or its agent's discretion the option to replace the BT Converse 2200, or any component thereof, which is identified as faulty or below standard, or as a result of inferior workmanship or materials. Products over 28 days old from the date of purchase may be replaced with a refurbished or repaired product.

The conditions of this quarantee are:

- The guarantee shall only apply to defects that occur within the 12 month guarantee period.
- Proof of purchase is required.
- The equipment is returned to BT or its agent as instructed.

This guarantee does not cover any faults or defects caused by accidents, misuse, fair wear and tear, neglect, tampering with the equipment, or any attempt at adjustment or repair other than through approved agents.

This guarantee does not affect your statutory rights. For further information within and outside the 12 month guarantee, please refer to the full user guide at www.bt.com/producthelp

Product disposal instructions

The symbol shown here and on the product means that the product is classed as Electrical or Electronic Equipment and should not be disposed with other household or commercial waste at the end of its working life.

The Waste of Electrical and Electronic Equipment (WEEE) Directive (2002/96/EC) has been put in place to recycle products using best available recovery and recycling techniques to minimise the impact on the environment, treat any hazardous substances and avoid the increasing landfill.

Product disposal instructions for residential users

When you have no further use for it, please remove any batteries and dispose of them and the product as per your local authority's recycling processes. For more information please contact your local authority or the retailer where the product was purchased

Product disposal instructions for business users

Business users should contact their suppliers and check the terms and conditions of the purchase contract and ensure that this product is not mixed with other commercial waste for disposal.

Your phone Z

1 The light will only flash when connected to a PBX switch or similar. The light will not flash when used with network services. e.g. BT 1571.

🗐 Handset & Hearing Aid 🇷

Hearing aid wearers may benefit from switching their hearing aid to the middle T position and holding the earpiece up to the aid, not their ear. Please visit http://www.btplc.com/inclusion/ for further practical advice on using hearings aids.

Making calls

10 one-touch

Lift the handset and dial the phone number. Replace the handset to end the call.

Make a call using a headset

Headsets are not supplied. However, you can purchase headsets (with RJ11 jack) by visiting www.shop.bt.com

Plug the headset into the socket marked Q on the underside of the base.

Press and dial the number. When the headset is in use the headset indicator (on the button) will be lit.

Press Headset to end the call.

Receive a call using a headset

When the phone rings and the headset is plugged in, press to answer.

Redial

Lift the handset, or press , then press to redial the last number called.

Handsfree

Press during a call to switch between earpiece and loudspeaker.

Secrecy

Press during a call. The red secrecy light (on the button) comes on and your caller cannot hear you. Press again to return to your caller.

Message waiting

If your BT Converse phone is connected to a switchboard, the message waiting indicator will flash when you receive new voicemail messages.

BT 1571 or similar network voicemail users can also use this feature, however the indicator light will not flash. New voicemail messages will be indicated by a stuttered dial tone when you pick up the handset.

If your telephone is connected to a switchboard you may need to change the message waiting switch setting on the base of the phone. It is pre-set to MW3 which is for an SX2000 switch. MW1 and MW2 positions are for when the telephone is connected to an ISDX switch. If the switch is moved to MW2 and the message waiting indicator stays on permanently, use MW1.

Lift the handset, or press and dial 1 5 ½ 7 ½ 1, to connect to your answering service.

Adjust the ringer volume

Set the **Ringer Volume** switch on the underside of the phone to 0 (Off), 1 or 2.

Adjusting the ringer tone

Set the **Ringer switch** on the underside of the phone to 1 (Low), 2 (Medium) or 3 (High).

Amplify

Press Amplify to switch the earpiece/headset volume to High. After you hang up, the volume will automatically return to Normal volume.

One-touch memory buttons (M1-M11)

Store your 11 most frequently used phone numbers on the grey one-touch memory buttons for ease of dialling. Buttons 7–11 have been pre-programmed with the following BT Services, however you can overwrite them with your own numbers.

M7 = Residential Directory Enquiries 118 500, M8 = Business Directory Enquiries 118 700, M9 = BT Answer 1571, M10 = Call Divert On, M11 = Call Divert Off.

Store/replace a one touch number

Lift the handset, or press Headset, to get a line.

Press and hold the grey memory button you want until you hear a beep and the Secrecy light flashes.

Enter the number you want to store.

Press the same grey memory button to confirm. The number is stored. You hear a confirmation beep. Pull out and use the memory label next to the button to keep a note of the person's name.

Dial a one-touch memory number

Lift the handset, or press reader, then press the one-touch button you want. The stored number is dialled.

Storing a pause in a number

A pause is normally inserted in a stored telephone number after a switchboard access code (e.g. 9) to allow the switchboard time to get an outside line before the number is dialled. For example, 9 – Pause – 08702405522.

To enter a pause, press in the appropriate place when storing the number.

Most problems can be fixed with a few simple checks.

Problem	Solution
No dial tone	Only use the cables supplied. Make sure the line cord is plugged into the correct socket.
You have a dial tone, but the phone will not dial out	If you are connected to a switchboard, check whether you need to dial an access code or if you need to change the dial mode.
Phone ringer does not ring	Is the ringer volume switch set to 0? Move the ringer switch to 1 or 2.
Using broadband on the same phone line?	Make sure you plug the phone into the wall socket via an ADSL microfilter (not supplied), otherwise you may have problems with this product and your broadband service. ADSL microfilter
