

TripleFi 10

Live in concert.

Live in concert – TripleFi 10 earphones. Triple because it directs the low, mid and high frequencies to a separate speaker, a total of three in each ear (that's patented, you know). That means you'll hear every layer of sound, every nuance, every detail. A musician's breathing. Fingers sliding across guitar frets. Yes, you'll hear all that just as if the artist were performing live before you. It's the sonic equivalent of sitting in the world's best recording studio. How much clearer can we get?

Three individually balanced speakers per ear

Integrated passive crossover

Audio channels and filters

Metallic carrying case

TripleFi 10
