# NO LIMITS

MSI® X99 Overclocking motherboards are for those living on the edge. No other motherboard series is produced with more care and tested more extensively and over a longer period of time than MSI's X99 OC series motherboards and that translates directly to more stability and higher overlocks.

## Multi-GPU

The MSI X99S XPOWER AC motherboard supports Quad- GPU SLI / CrossFire. Optimal PCI-Express slot placement allows for better fitting and airflow. That way, you can enjoy the best graphics at the highest frame rate jumping off from your screen when running a NVIDIA® SLI™ or AMD CrossFire™ setup.
